CORNWALL
FIRE & RESCUE SERVICE
A service of Cornwall Council

Your ref: CFO Control Project
My ref:
Date: 15 September 2022

Dear Town Council,

I wanted to provide an update on a project regarding our Fire Control function we have ongoing within our Service.

The Service are undertaking an efficiency review of Fire Control. As part of this review a preferred option has been identified. This option going forward for fire scrutiny is to devolve the delivery of the Fire Control function through an established Control partnership. The next phase of this project will be to review the opportunities and potential partnerships for Cornwall to commission this function.

This review and potential partnership approach does not include the CCTV function, the review and options only include the statutory duty to call handle, mobilise and support fire and rescue functions.

We will keep you updated as necessary and of course any queries or questions you may have then please contact us.

It is always a privilege to work alongside you and your teams across our communities of Cornwall and I look forward to maintaining our collaborative work.

Kindest regards,

A handwritten signature in black ink, appearing to read "Kathryn Billing".

Kathryn
Chief Fire Officer
Cornwall Fire and Rescue Service
