Planting & growing seasons

Autumn/winter season is October-April
Spring/Summer season is May-September

The social, economic & environmental impacts of our work

Social

Increased positive feelings about the town lead to a reduction in anti-social behaviour
Public projects attract volunteers and improve community cohesion
Attractive streetscene improves wellbeing and supports mental health
Restoration of civic pride
Participation in consultations

Economic

Attractive town centre and restored sites attract residents and visitors to the town who will spend more time in the centre and potentially spend more money.
Maintained planting and design provides an attractive backdrop to outdoor events
Volunteering enhances public expenditure and local GVA
Supporting delivery of Liskeard Neighbourhood Plan

Environmental

Living and practical examples of environmental care and the benefits it brings
Planting attracts pollinators
Partnership working increases the opportunities for joined up working to improve built environment
