Audio System

Mic Stands

7 x Boom
5 x Straight
1 x Short flexi

Cabling

Stage to FOH via CAT6 Allen & Heath DX 168

6 x 3m XLR/XLR
2 x 5m XLR/XLR
6 x 6m XLR/XLR
2 x 8m XLR/XLR
6 x 10m XLR/XLR
2 x 9m mXLR/1/4" jack
2 x 9m fXLR/1/4" jack
1 x 15m 8 xlr channel stage box
1 x 5m 4 channel XLR/XLR multicore

Playback

We have a windows laptop available for you to load your digital media on which can then be triggered from Windows Media Player. We also have CSC show control cueing software available for theatre productions. Alternatively the Allen & Heath SQ6 has playback facilities for mono or stereo, uncompressed *.wav files of 44.1, 48 or 96kHz and 16 or 24 bit.

They must not contain any headers (such as BWF) or data (such as markers).

Projection

Optoma 4k DLP Projector (flown)
HDMI input via CAT6 convertor from FOH control or stage.
Fixed position 6m x 4m Projector screen on stage. Electric fly in/out operated on stage.

Lighting System

Control

ChamSys MagicQ MQ50
8 universe ArtNET node

Fixtures

16 x LEDJ Spectra 12HEX10 (RGBWAUV)
2 x LEDJ Spectra 6HEX10 (RGBWAUV)
10 x 500w PAR lanterns
10 x 1200w fresnels
8 x 600w profile spots
4 x 1000w profile spots

The performance lighting system installed in the Public Hall has been designed as a versatile general purpose rig capable of supporting exhibitions, seminars and performances on catwalk or "in the round" as well as stage productions.

It comprises 136 separately wired circuits feeding sockets on seven overhead bars, six side bars and four low level outlets on stage.

These circuits are patched into 72 dimmer channels, each able to supply two circuits with each dimmer channel having a capacity of 2,4kW. Each dimmer rack is supplied through its own MCB, four from each phase of the supply and there is a three phase RCD to protect the entire system.

THE LOAD MUST NOT EXCEED 15KW PER PHASE and should be balanced as far as possible whilst minimising the cross phase connection of adjacent circuits.

When adjusting fixtures, please note their original orientation and return them to this on completion.

We have recently upgraded to include some LED lamps and new lighting console. Controlled via ArtNET node we are now running 8 physical universes creating a truly versatile system. We have also added DMX and hot power to all the fixture bars and low level on stage.
